

Tech & Development

Cybor Holding Limited is a UK-based integrated technology group providing endto-end solutions that protect and propel modern businesses. Our unique strength lies in connecting deep cybersecurity expertise with forward-thinking software development and financial technology.

Our Core Service Pillars

- Bespoke Software & Development
- Strategic Technology Consultancy
- Managed IT & Security Services
- Digital Finance & Payment **Gateway Solutions**

We believe security is not a feature; it's the foundation. This "secure-by-design" philosophy governs every solution we deliver, from multinational corporate systems to the tools that protect your team.

We don't just respond to the digital landscape; we help you build it, ensuring your investments are resilient, scalable, and future-proof.

Enterprise-Grade
Digital Protection
Products

Advanced Antivirus & Anti-Malware: Realtime protection against viruses, ransomware, and spyware.

Secure VPN Services: Military-grade encryption to secure data on any network and ensure privacy.

WHY CHOOSE US?

Holistic Approach

We connect software, security, and payments into a cohesive strategy.

Secure-by-Design

Security and compliance are embedded from the ground up in every project.

Proven Methodology

We deliver success through a structured process of discovery, design, development, and evolution.

Strategic Partnership

We act as an extension of your team, invested in your long-term growth and security.

We offer products from award-winning providers including ESET, Bitdefender, and McAfee.

Client Successes...

"Cybor Holding didn't just deliver software; they delivered a transformation of our entire operation. Their understanding of both technology and our industry allowed them to create a solution that has become the backbone of our business growth."

Sarah Chen, COO, Axiom Logistics

"We trust Cybor with our technology completely. From strategic consultancy to the software they build and the security they provide, they are the single, reliable source for all our tech needs."

• Michael Reed, Operations Director, Sterling Manufacturing Co.

Bespoke Software & Development: Engineering Your Digital Advantage

We design, develop, and deploy custom software applications, SaaS platforms, and integrated systems that solve your unique business challenges. Our proven methodology—from discovery and strategy to deployment and evolution—ensures we deliver intuitive, powerful, and scalable solutions that become the backbone of your operations.

Our Expertise Includes:

- Custom Web & Mobile Applications
- SaaS Platform Development
- System Integration & API Development
- · Legacy System Modernisation
- Cloud-Native Development (AWS, Azure, GCP)

Strategic Technology Consultancy: Your Guide in a Complex Digital World

Navigate your digital transformation with confidence. Our senior consultants provide the expert guidance you need to make informed technology decisions, mitigate risks, and leverage IT for a competitive advantage.
